## Ingen endringer

Vår portefølje var ned med 1.9% fra mandag formiddag forrige uke til mandag formiddag denne uken. Til sammenligning var OSEBX-indeksen i samme periode ned 1.7%. Så langt i 2022 er porteføljen ned 7.9%, mens OSEBX-indeksen i samme periode er ned med 2.9%. Denne uken gjør vi ingen endringer.

**Porteføljeutvikling.** Oljeprisen var ned 10% forrige uke og med en overvekt i energisektoren ga dette en svak uke for porteføljen. DNO var ned 9.5%, etterfulgt av Aker BP (-4.2%) og Equinor (-2.2%). Stortankratene hadde en ny sterk uke og ligger nå over USD 100,000 pr dag. Dette ga et løft på 10.6% i Frontline og begrenset fallet for porteføljen til bare så vidt mer enn indeksen.

**Ingen endringer denne uke.** Oljeprisen er litt opp i forhold til stengetid i Oslo på fredag og vi venter en uke til før vi konkluderer om vi skal endre overvekten i energiaksjer. Med børsen i USA stengt på torsdag i forbindelse med Thanksgiving, og bare åpen halv dag på fredag, forventer vi en relativt rolig uke. Referatet fra Fed-møtet i november og PMI tall for Eurosonen er ukens makrohøydepunkter.

**Porteføljen består av følgende aksjer:** Aker BP, DNO, Equinor, Frontline, Gjensidige, Mowi, Nordic Semiconductor, Norske Skog. Begrunnelsen for hvert enkelt selskap er oppsummert mer i detalj fra side 3 i denne rapporten.

I vår beregning av avkastning baserer vi inn- og utkursen på åpningskursene mandag morgen. Porteføljen er likevektet og ukens avkastning reflekterer dermed et samlet gjennomsnitt av kursutviklingen for alle aksjene gjennom uken. For selskaper på OBX-indeksen bruker vi gjennomsnittlig kurs frem til kl. 10.00 på mandag, mens vi for andre aksjer bruker gjennomsnittet frem til kl. 12.00. Avkastningen for OSEBX beregnes fra kurs kl. 10.00 mandag.

## Equinor (EQNR)

- Til tross for en nedjustering av DNB's gassprisanslag, tror vi etterspørselen blir sterk i flere år. Eksplosjonen i Nordstream rørledningene gjør det lite sannsynlig at Russland blir en like stor leverandør av gass til Europa som før, selv om det skulle bli fred i Ukraina.
- Tilbudssiden for olje kan bli stram i en lengere periode. OPEC har vist at de er proaktive med å kutte produksjonen når oljeprisen har falt under USD90/fat. Dette gir en asymmetrisk risikoprofil med støtte på nedsiden men ingen begrensing på oppsiden.
- Selv om det politiske presset mot oljeselskapene for et grønt skifte på kort sikt er noe redusert tror vi at den lange horisonten utbyggingen av nye felt krever og usikkerheten dette har skapt kommer til å begrense nye investeringer i tiden fremover. Vi tror resultatet av dette er at utbyttebetalinger blir prioritert fremfor store investeringer.
- Sektoren prises på veldig lave P/E-multipler og med høy direkteavkastning, noe som indikerer at markedet tror dagens høye olje- og gasspriser blir kortvarige. Sammen med Aker BP og DNO blir sektorvekten i porteføljen 38%, mens sektorvektingen av oljeselskapene i OSEBX-indeksen er 32%.

## Nordic Semiconductor (NOD)

- Apple's nye AirPods inneholder en chip fra Nordic Semiconductor, noe som bekrefter en solid utvikling i etterspørselen. Vekstpotensialet har blitt noe begrenset av tilgangen på halvledere, men nå er det indikasjoner på at flaskehalsene i forsyningskjeden begynner å løses.
- Nordic Semiconductor har sterk langsiktig strukturell vekst fra sin Bluetoothteknologi og megatrenden innen 5G og Internet of Things (IoT).
- I motsetning til mange øvrige vekstselskap på Oslo Børs har Nordic Semiconductor en sterk balanse og en positiv bunnlinje.

## Gjensidige (GJF)

- Gjensidige har en sterk historikk med oppjusteringer av konsensusestimater og langsiktig verdiskapning.
- Gjensidige er et selskap hvor inntjeningen i relativt liten grad er påvirket av veksten i økonomien. Det bidrar til å redusere betaen i porteføljen.
- Gjensidige har en solid direkteavkastning på 5%. Dette gir noe nedsidebeskyttelse.

## Norske Skog (NSKOG)

- Norske Skog rapporterte underliggende Q3-tall på linje med våre forventninger og justerte opp sine forventninger til inntjeningen fremover. Konsensusestimater for 2023 EBITDA ligger nå 52% høyere enn ved starten av 2022. Oppjusteringen av estimatene gjør at verdsettelsen ikke har blitt dyrere til tross for en sterk kursutvikling så langt i år.
- Tilbud-/etterspørselsbalansen i det europeiske papirmarkedet er sterkere enn de siste årene og med stigende priser, men samtidig utsikter for stabile kostnader, inn i Q4 venter vi at inntjeningen i Q4 vil bli betydelig bedre enn i Q3.
- Ledelsen bekrefter at prosjektet i Bruck, med produksjonsendringen fra papir til bølgepapp, går etter planen. Det er ventet at produksjon starter opp fra første kvartal 2023.

## Frontline (FRO)

- Stortankratene har steget kraftig de siste ukene og oppgangen i ratene på høsten pleier normalt ikke å nå en topp før på slutten av året. Det kan gi en god medvind for Frontline de neste månedene.
- Stortank er veldig syklisk og korte perioder med veldig sterk lønnsomhet kan bli etterfulgt av lange perioder med svak inntjening. Begrenset flåtevekst de neste årene kan gjøre at den

gode tilbuds- og etterspørselsbalansen, samt store utbyttebetalingene, denne gang kan vare lenger enn normalt.

- Prising er fremdeles relativt attraktiv til tross for en allerede sterk oppgang. Frontline handles til 1.2x NAV, som er lavt, spesielt i perioder hvor markedet er sterkt.

## DNO (DNO)

- DNO handles til en P/E-multippel på 3x og har netto kontanter på balansen. Prisingen er ekstremt lav for et selskap som ikke har refinansieringsproblemer og dette bør gi en solid buffer for et noe frynsete rykte når det gjelder selskapsstyring.
- Tilbudssiden for olje kan bli stram i en lengere periode. OPEC har vist at de er proaktive med å kutte produksjonen når oljeprisen har falt under USD90/fat. Dette gir en asymmetrisk risikoprofil med støtte på nedsiden, men ingen begrensning på oppsiden.
- Selv om det politiske presset mot oljeselskapene for et grønt skifte på kort sikt er noe redusert tror vi at den lange horisonten utbyggingen av nye felt krever og usikkerheten dette har skapt kommer til å begrense nye investeringer i tiden fremover. Vi tror resultatet av dette er at utbyttebetalinger blir prioritert fremfor store investeringer. ## Mowi (MOWI)

- Hele sjømatsektoren falt kraftig etter forslaget fra regjeringen om å innføre en grunnrenteskatt for lakseoppdrett. De negative konsekvensene av dette tror vi nå er priset inn, mens det er mulig det kan bli noe oppmykning etter at det blir tydelig at dette har negative konsekvenser for investeringene i distrikts-Norge.
- Med virksomhet i Norge, Skottland, Irland, Chile og på begge sider av Canada er Mowi mer geografisk diversifisert enn de øvrige større selskapene innenfor sektoren. På våre estimater har selskapet rundt 43% av inntjeningen fra oppdrettsaktivitet i Norge, mens denne andelen for de øvrige større norske aktørene er estimert å ligge på 64-92%. Dette reduserer etter vårt syn noe av risikoen dersom grunnrenteskatten blir vedtatt på grunnlag av det eksisterende forslaget.
- Fjerdekvartal har historisk sett vist seg å være en god børsperiode for sektoren, med stigende laksepriser etter svakere priser i andre og tredje kvartal. Lakseprisene er forventet å stige denne uken og dette kan være starten på sesongoppsvinget som gjerne kommer mot slutten av året.

## **Risk warning – generally high risk**

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.
